Modern living space with history.

Sustainability was also a central theme during construction: The DGNB certificate according to SGNI at Gold level underscores the high standards of execution from a single source.

Impressions

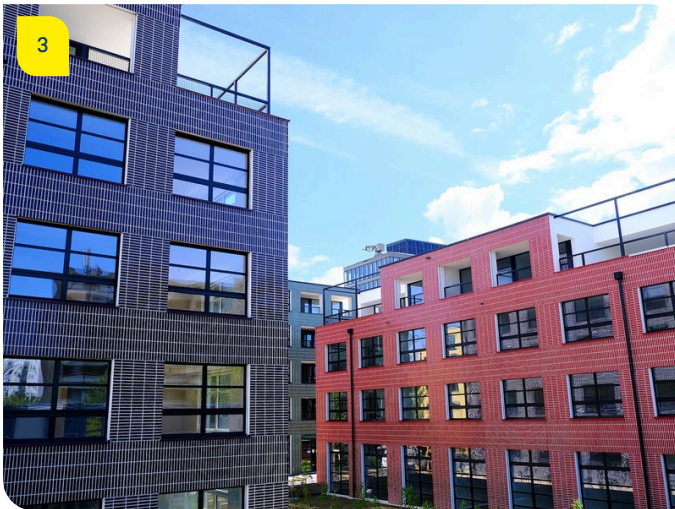

Image notes

1

A new district in four colours.

The apartment buildings captivate with their glazed ceramic facades in green, yellow, blue and red.

2

Attractive avant-garde with industrial character.

3

Living space in colourful variety.

In the four apartment buildings, a total of 70 residential units with different housing types and standards were created.

The robustness and discreet design of the ceramic facades and the horizontal formats of the window subdivision are reminiscent of the site's industrial history.
